

For the foundation of a new development team, we are looking for our location in Pécs for several

Software-Engineers (Embedded Systems, IoT, Linux, Security, GUI)

Development of new ideas. Production of innovative and smart solutions. Supplying different industries. This has been our profession for 25 years!

Today we are a leading electronics service provider with 300 employees in Pécs, Tab and Germany. Become part of our company.

Your tasks

- › Independent software development (firmware, graphical user interfaces, applications) for devices in industrial electronics, medical technology or security technology using Linux, GUI tools and current programming languages
- › Design and creation of hardware-related software systems with a focus on IoT, security, communication protocols and display controls
- › Creation of requirements specifications and development documentation
- › Supporting work for the preparation of proposals for software development services

Your profile

- › A degree in computer science, electrical engineering/electronics, mechatronics
- › Experience in the development of embedded software
- › Good understanding regarding embedded microprocessor systems
- › Experience in using the relevant development and debug tools
- › Willingness to take responsibility and communicative competence in talking to different groups of people
- › Good knowledge of English, ideally also good knowledge of German

Your benefits

- › Secure permanent position in an economically strong company
- › A modern workplace with a pleasant ambience
- › The opportunity to play a key role in building a new team and if necessary, to assume leadership responsibility
- › Onboarding and major project meetings in Germany
- › An endowment that meets your imagination
- › The possibility to also work in a home office

If you are interested in this responsible, long-term position with good prospects in a healthy company, please send your complete application documents, stating your possible starting date and your salary expectations, to our Human Resources Department. We can also inform you in advance by phone about the respective job requirement.
